

Travel Booking System

Project Overview

This project is a basic travel booking website.

There are two types of users:

- Admin
- User

Admin will add and manage trips.

Users will view trips and book them.

Admin Side

1. Add Trip

This is the main feature.

Admin will fill a form to create a new trip.

Form fields:

- Trip Title (example: Trip to Lahore)
- Destination (Lahore, Multan , etc.)
- Price
- Start Date
- End Date
- Image

Purpose:

Admin creates trips that will be shown to users.

2. Manage Trips

Admin can see all trips in a list.

Admin can:

- Edit a trip
 - Delete a trip
-

3. View Bookings

Admin can see all bookings made by users.

Booking details:

- User Name
- Email
- Trip Name
- Status

Admin can change booking status:

- Pending
- Confirmed
- Cancelled

Admin Summary

Admin does four main things:

- CRUD for trips
- CRUD for users
- Manages bookings

User Side

1. View Trips

Users can see all available trips on the homepage.

Each trip shows:

- Title
- Destination
- Price
- Dates
- Image

2. Trip Details

When a user clicks on a trip, full details are shown.

Details include:

- Trip name
- Price
- Start and end date
- Image

There is also a "Book Now" button.

3. Book Trip

User fills a simple form to book a trip.

Form fields:

- Name
- Email
- Selected Trip

Purpose:

User reserves a trip.
